Klaten Regency, Central Java Province, Indonesia

I am a Computer Science graduate with approximately 4 years of experience since studying at Sahid University Surakarta majoring in informatics. On campus I am active in organizations by participating in several UKM and BEM. When I was an intern, I worked as a Front-End, creating a web project property application (Property Order based on Real Estate Development) and my final task is to create a system Web-Based Tofu Factory Information regarding raw material stock management and sales. I have skills in web and application development, as well as solid leadership and analytical thinking skills. I am interested in technological innovation and I enjoy participating in the developer community. In my spare time, I enjoy reading news in the media about technology, new things and learning programming and other skills either through bootcamps or independently.
