

RAMADHAN MUHAMAD TAUFIQ

Programmer, Desainer, Editor
IT/Digital, Leadership

 Klaten Regency, Central Java,
Indonesia

I am a Computer Science graduate studying at Sahid University Surakarta, majoring in informatics. On my campus active in organizations by participating in several UKM and BEM. When I was in college, I Internship, working as Front-End, creating web project property applications (Property Order based on Real Estate Development) and my final task is to create Web-Based Tofu Factory Information System regarding raw material stocks management and sales. I also have skills in web and application development as well as solid leadership and analytical thinking skills. I am interested in technology innovation and I enjoy participating in the developer community. Since before college until now I have extensive experience in organizational management (serving in various positions such as general chairman, deputy chairman, minister, and committee) in the Student Executive Board (BEM), Campus Da'wah Institute (LDK), UKM Undergraduate Student Association and Informatics Engineering (HIMATIF). In terms of work, I have interned as an Assistant Team Manager, Technical Assistant, and Frontend Developer, and have work experience as a Call Center. This experience has trained me to effectively carry out the duties required in my role at the company. In my free time, I enjoy reading news in the media about technology, new things and learning programming and other skills either through bootcamps or independently.
